Profile

Mr Troy Krause
South African

Interests

Knowledge Engineering
Open Source Development
Continuous Learning

Qualifications

Tertiary:
In the process of completing Bachelor of Information and Computer Sciences | 2023 – 2026 (Expected December 2026)

Education:
Northwood School Senior Certificate | 2022

Courses (Udemy):
UI/UX Design | In Progress
Front-End Web Development | In Progress
PostgreSQL | In Progress

Technical Skills

- BACKEND**
 - ▶ C# / .NET / ASP.NET Core
 - ▶ Entity Framework Core
 - ▶ RESTful API Design
 - ▶ SQL Server
- FRONTEND**
 - ▶ Angular & TypeScript
 - ▶ JavaScript & React
 - ▶ DevExtreme
 - ▶ HTML5 / CSS3 / Bootstrap
- CLOUD & DEVOPS**
 - ▶ Azure (App Services, Functions, Service Bus, Azure SQL)
 - ▶ Docker
 - ▶ GitHub Actions CI/CD
- DATABASES**
 - ▶ SQL Server · PostgreSQL
 - ▶ MongoDB · Oracle

Interpersonal Skills

- ✓ Self-motivated & resilient
- ✓ Quick learner
- ✓ Strong communicator
- ✓ Problem solver
- ✓ Team player
- ✓ Detail oriented
- ✓ Adaptable

Professional Summary

Motivated mid-level full-stack developer with 2+ years of commercial experience building production-grade web applications on the .NET/C# stack. Comfortable across the full delivery lifecycle — from designing RESTful APIs with Entity Framework and SQL Server, to building responsive Angular interfaces. Hands-on with Azure cloud services and CI/CD via GitHub Actions. Currently in the final year of a Bachelor of Information and Computer Sciences (Application Development), expected to graduate in December 2026. A self-starter passionate about knowledge engineering and building intelligent systems.

Career Highlights

Secured a full-stack developer role while completing university studies

While still at the end of his first year of study, Troy secured a position at The Development Company, balancing professional and academic commitments and gaining nearly three years of real-world experience while completing his degree (expected December 2026).

Building production-grade cloud-native applications

Designing, developing, and maintaining production web applications using .NET and Angular with Azure cloud services, CI/CD pipelines, and modern agile practices.

Career transition driven by a passion for technology

Diverse experience in teaching and hospitality developed strong communication skills. The deliberate transition to software development demonstrated perseverance and commitment.

Career Journey

November 2023 – September 2026

The Development Company

Mid-Level Full-Stack Developer

Durban, KwaZulu-Natal, South Africa

Departure due to company retrenchment.

- Built and maintained full-stack web applications using .NET/C#, Angular, and SQL Server.
- Developed RESTful APIs and responsive UIs with Entity Framework Core, TypeScript, and DevExtreme.
- Deployed cloud-native solutions on Azure with CI/CD via GitHub Actions.
- Collaborated in agile sprints, code reviews, and technical design discussions.
